

## What Farming Is

Not Merely A Business But Building A Home

When a boy goes hunting a farm his first question often is, "What is the location of the property in relation to schools, churches, highways, markets and shipping points?" Farming is more than a business. Farming is living, building a home, rearing children and educating them.

Here is where community life comes into the picture. When people take an interest in neighborhood affairs; when they help to improve their schools, their churches, their roads; they are improving their own surroundings and adding to the value of their farms.

It is a very calculated buyer in fact, who would purchase a farm in a district where the community life is dull, and where schools and churches, physically and spiritually, are in a state of real repair.

## NEW HEALTH FOR

## TIRE-OUT WOMEN

Found in the Rich, Red Blood Dr. Williams' Pink Pills

Actually Make Anemia common on gradually, beginning with languor, indigestion, occasional loss of sleep, nervousness and a feeling of fatigue. Later on, the business with each other heart, headaches, frequent backaches and often disturbed digestion and an inability to obtain rest at night. Cases of this kind, if neglected, become chronic and the recovery of time there is no need to worry. Dr. Williams' Pink Pills will cure you free from any harmful or habit-forming drug, and just the tonic needed to remedy the weakened state of health. These pills actually make the rich, red blood, the source of strength, strengthen every organ and nerve in the body, and bring about a voluntary return, the appetite improves and the body is again in a normal condition. In fact it was hardly able to do much work about the house. I decided to try Dr. Williams' Pink Pills and after taking a few boxes, I feel much better in health and strength and was able to do my work with no more of the former weakness. I cheerfully recommend them to others who may be in a run-down condition. You can get the pills in your drugstore, or by mail at 50 cents a box from Dr. Williams' Pink Pills Co., Brockville, Ont.

## The Architect's Secret

Strange Memorial Has Been Purchased For Three Hundred Years

In an ancient city of India stands what is often called the most splendidly poetic building of the world. It is the far-famed Taj Mahal, which was built by the Emperor Shah Jahan as a final resting place for his favorite wife, Mumtaz Mahal. One of the princes of India some years ago told the following story regarding it: When the mausoleum was being built the architect, was authorized to embody in the structure some memorial to himself. He kept his own counsel and when the edifice was completed it was found that his memorial consisted in this—that whenever it rains from high up in one of the domes three drops of water fall in succession to the floor below. No matter how hard it rains or for how long, three drops and only three descend to the floor. The architect's wisdom. For nearly three hundred years men have puzzled in vain to learn by what artifice this result was accomplished, and the secret still lies hidden within the marble masonry of that dome.

Headaches may be swiftly and safely relieved by an Aspirin tablet. A most efficient remedy, there's no after effect; its use avoids much needless suffering. Try it next time; see how soon its soothing influence is felt. Just as helpful when you have a cold; neuralgia, neuritis, rheumatism, lumbago. Just be certain you get real Aspirin—the genuine has Bayer on the box, and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade name registered in Canada for Acetylsalicylic Acid. While it is well known that Aspirin means Bayer's Aspirin, to insure the public against imitations, it will be stamped with Bayer's "Bayer" trademark.

## Is Unique Institute

Children Eryn Many Lands Attend International School at Geneva

One of the most unique educational establishments in the world exists at Geneva, Switzerland, where at "Ecole Internationale," children of seventeen different nationalities receive instruction together. Writes the editor of "Interdependence," the monthly review of the League of Nations, (international civil servants) of officials of the International Labor Office, of the International Red Cross, the Y.M.C.A. and of other international organizations which have their headquarters at Geneva. A laudable educational project was presented when, following the formation of the League of Nations, individuals of many different nations connected with the Secretariat had to take up residence in Geneva and establish their families there. There came Czech and Chinese children, Latin and Lithuanian, English and French, and the progeny of many other nationalities. The facilities offered by the Swiss schools were not attractive, as emphasis was placed upon Swiss national history and culture and national, rather than international matters.

A school was finally evolved that gave fair and even treatment to the interests of all nations represented, and which was run on strictly international lines. The children of all languages being English and French. It was founded in 1924 and has since demonstrated its importance and efficiency, having grown from a small day school of twenty-four pupils to an institution with both day and boarding departments. Children unacquainted with French or English are taught one or the other and, after a few months, are sufficiently familiar with the new language to take their lessons in it. English scholars can usually acquire a working knowledge of French in six months, but the French usually take a little longer as they hear the English language only in school.

## Douglas Fir

Tree Received Its Name From David Douglas, Scottish Botanist

Douglas fir, the largest timber tree grown in Canada, receives its name from David Douglas, the first person to describe the tree to the scientific world. Douglas was a Scottish botanist who, just one hundred years ago (the first came to America in 1823 and left this continent in 1833) spent several years in British Columbia and the northwestern United States. During this time he discovered a hundred and fifty species of plants previously unknown to science, and he introduced into cultivation in the British Isles two hundred and seventeen species, including the Douglas fir, the sugar pine, and the redwood. The Douglas fir was first discovered by A. Menzies, the surgeon of Vancouver in his voyage of discovery, but was introduced to Europe by Douglas.

## U. S. Government Pays Deficit

Brigadier-General Herbert M. Lord, director of the United States budget, expressed the opinion that the country faced a possible deficit of \$50,000,000 this fiscal year, due to the expense of new legislation and tax refunds. He said he was hopeful of making his books balance, if the returns under the new tax bills were large enough.

## Not For Publication

"Would you like some views of the hotel? I send your friends" asked the police hotel manager. "No," replied the distressed guest. "I think it would be better for me to keep my views of this place to myself."

Blue pencils have become famously popular with editors because blue, more than any other color, competently hides the word to be deleted.

"Perhaps the skeleton in his pants' closest matters little if he has plenty of bones in his bank account!"

"You look miserable. Haven't you lost anything?" "Yes—a goosekeeper!" — Journal Amman, Paris.

W. N. H. 1770

## Using Poison Duet

To Protect Timber

Government To Start Intensive Campaign Against Forest Menace

Government departments, specializing in the work of forest protection, will enter another and more intensive campaign against the insect plague to timber during 1928, according to a statement from the entomological branch of the Department of Agriculture. Aerophanes will probably play an important part in this new war. Machines specially equipped for the work to destroy a poison dust over forests where the appearance of the insect destroyers is noted and experts hope to put into service a larger machine than has been formerly employed.

Operations during 1926 showed that blasting by means of a special ty-equipped aeroplane hired for the purpose cost \$7.04 per acre, over 75 times the cost of forest. An official appendix to this report says "This amount is considered very moderate when compared with the value of the trees saved."

## Advance In Aviation

333 Planes Now In Operation In The Dominion

Aviation in Canada is developing rapidly. A recent official report disclosed there are 333 airplanes in operation in the Dominion compared with 161 early in 1927. Of the total of 333 planes, 246 are engaged in commercial work and 87 in the service of the Canadian federal and provincial governments. For forest protective work, map photography, mail carrying and a variety of other tasks that call for speed. There are now 44 air barriers in Canada as compared with 25 at the beginning of 1928. Licenses held by commercial pilots as of Jan. 1, 1928, numbered 190 or more than four times the number held on the corresponding date last year.

## Silver Fox Most Important

It has always been the practice of trappers to keep foxes caged in the warm weather alive, when possible, until the winter season, for then the fur is prime, and consequently much more valuable. From this custom has arisen the modern industry of fur farming. Several new 44 air barriers in Canada as compared with 25 at the beginning of 1928. Licenses held by commercial pilots as of Jan. 1, 1928, numbered 190 or more than four times the number held on the corresponding date last year.

## Notable Rocky Mountain Pass

Jarvis pass, a densely timbered crossing on the Alberta-British Columbia international boundary, is remarkable for containing a number of small lakes, on its summit, distributed on both sides of the watershed. The water from some of the lakes flows westward to the Pacific while from the others it runs eastward to the Atlantic.

## Professor (to student) — "How dare you contradict me, sir?"

Student: "Well, sir, I'm paying for this course and the customer is always right."

## Ren: "Another argument with your husband? What's the trouble this time?"

Freda: "The same old thing. I'm right and he won't agree with me."

## Mother-in-law: "My dear girl, any woman would be satisfied with what John says he gives you!"

Young wife: "So would I."

A volunteer defense force is to be formed by the Irish Free State in response to the regular army and national reserves.

## Mouldy Butter

Many Factors May Prove To Be The Cause For This Condition

Creamery butter which passes some test, making into the hands of the trade may afterwards develop certain defects. One of the most serious defects that crop up in this way is the presence of mould spots on the surface and on the parchment covering. Addressing the Canadian Creamery Association, Dr. E. G. Hood, chief of the division of dairy research in the Department of Agriculture at Ottawa, pointed out that while trouble from mould is decreasing from year to year, it still appears at times in both commercial and exhibition butter. Creamery men were urged to find out the sources of this trouble so as to apply preventive measures. Dr. Hood pointed out that mould has been found to enter largely from the following sources: Improperly pasteurized cream; recontamination of pasteurized with vat cream; insanitary equipment, as holding vats, condensors, pumps, outlet valves; unsterilized churns and packing equipment; improperly treated liners carelessly stored and infected from insular surroundings.

## Watching The Little Things

Many Matters Receive Consideration of League of Nations.

While the primary work of the League of Nations is to promote international peace, many and various of our matters arise from time to time for their consideration. For instance a new road sign which the Westminster City Council is going to introduce has been recommended by the League. It is a blue "X" in a white circle. It appears the motorist in Westminster will know that he is at liberty to park his car. The sign has been agreed upon as an international one, provided it is considered successful when tried out at Westminster. It is to be signed "X". In London, Stockholm, or Copenhagen will know without having to make tedious inquiries, whereas he may leave his car without incurring the displeasure of a policeman.

## New Peaks of Progress

Canada Fights Amongst The Nations In Volume of Exports

In his review of the year 1927, the Minister of Trade and Commerce, Hon. James Macdonald points out that while the year of the Diamond Jubilee of Confederation (1927), created new peaks of progress, the year 1928 went even beyond those records. He points out that while Canada ranks only 26th in population, it comes fifth among the nations in the volume of its exports; third in the trade balance; second in its per capita exports and first in its per capita trade balance.

## Heavy Yield of Wheat

Adolphe Hotte, whose farm is about a mile north of the Canadian border at the British motorist in Berlin, Beaver Lodge, Peace River, Alberta, threshed 57 acres of Garbat wheat that averaged 49 bushels to the acre. The land on which the wheat was grown was semi-arid and was broken in 1927.

The northernmost telephone pole in the Western Hemisphere is at Norvik, Alaska. The line is maintained by the government.

## BRANCH LINE BUILDING PROGRAM

Announcement of a large branch line building program of the C.P.R. and C.N.R., totalling nearly \$30,000,000, has launched a strenuous "stop" conflict for the railways. It is Henry Thornton, president of the C.N.R.; J. H. Charles A. Dunning, minister of railways and canals; S. E. W. Beatty, president of the C.P.R.

## Smut Diseases Of Plants

Minute Parasitic Organisms That Live On The Tissues Of Growing Plants

According to the latest reports of scientific workers, smut diseases are not confined to cultivated plants. Smuts are caused by microorganisms, minute parasitic plants, incapable of manufacturing their own food, (these fungi) live on the tissues of plants. As a result of this the plant upon which the fungi live—the host plant—is seriously injured. The purpose for which it is cultivated are interested with, or frustrated altogether, and in some instances the plant dies.

Spores are formed by the fungi, and in the case of the spores of staining smut, of wheat, eight bush spores, side by side, are equal to the width of a human hair. The spores of the loose smut of wheat are even still, and eight of them are required to equal the width of a hair.

These fungus spores are not seen in the true botanical sense, though they reproduce their kind. They are minute, round or roundish, and lighter and lighter than read dust or similar substances easily carried in the air.

The "Smut Diseases of Cultivated Plants, Their Cause and Control" forms the subject of a most interesting bulletin published by the Department of Agriculture at Ottawa. It deals with the smuts of wheat, barley, oats, rye, corn, timothy, etc., and explaining in detail the various treatments for seed.

## Wrong For Sixty Years

Error in Whitaker's Almanac Has Just Been Discovered

After sixty years publication an error has been discovered in Whitaker's Almanac.

One of the Zodiacal figures has been printed wrongly.

In the 1929 volume—the 61st—the editor-in-chief points out that Capt. James Macdonald's true shape as a marquis-monster—a sea (not) be goat.

This erroneous drawing of the title page and in the almanac had remained undiscovered until a short time before the present edition was placed on the press.

Considering that this almanac, as is rightly claimed, is edited by the public—correspondents from all parts of the world suggesting and criticizing it every year—it is remarkable that the error should not have been discovered until the first issue.

## Assisting Canada's Navigators

For the benefit of navigators, six stations on the east coast of Canada, seven on the Great Lakes, and three on the west coast, broadcast twice daily at certain specified hours information covering weather forecasts, position and nature of dangers to shipping, etc. In cases of urgency, such as hurricane warnings, the information is immediately sent forth.

## Ask Better Freight Rates

Vancouver—Backed by the United Farmers of the three prairie provinces, the United Farmers of B.C. will carry British Columbia's claim for better freight rates to the government-in-council at Ottawa.

## "What is a 'preparation' parade?"

"A rehearsal of the wedding march, my son."

The wettest day recorded happened on June 14, 1911, at Hagio, Philippines, when forty-six inches of rain fell.

## Says Auto Produce Music From Bodies

Well Known Scientist Has Made Study of Insect Life.

Amazing discoveries about insect lives have been made by Dr. Robert Slagter, the well known scientist, who has been making study of the lives of various insects of Asia. Dr. Slagter's discoveries occurred while on an expedition trip. Noting a nest of large red ants, he decided to "watch their" movements when, to his astonishment, the insects began to emit tiny musical sounds. He decided to investigate.

Suddenly a number of the ants began knocking with the end of the abdomen upon the thin, resonant wall of the homestead, thus producing a sound that was evidently intended for an alarm signal. Dr. Slagter also discovered that some of the ants perform actual instrumental music.

"All of these musicians," he states, "make use of a similar instrument, differing only in being attuned to a higher or lower pitch. This instrument consists of two different parts, which I have named the lute and the plectrum."

"The lute is situated on the abdomen, and consists of microscopically fine grooves. The plectrum is in the shape of a rod or pencil, and is the organ that utilizes the abdomen and the thorax. When the ant moves its abdomen rapidly up and down the pencil moves in brief intervals across the grooves on the lute."

After then comes a sort of humming chirp which is perceptible by human ears only when a great number of the little musicians unite in a symphony."

## Annoying Fly Bankers

Ruth Mann Makes Out All Cheques In Roman Numerals

A certain practical joke among the rich men of Paris is causing annoyance by making out his cheques in Roman numerals.

Due to the order of Mr. John Doe, CXXIX francs, a read one cheque, for example: So far none of the banks have refused to honor the cheques, but in each case the recipients have been shamed from office to office. In each case it has taken no less than an hour to obtain the money.

A wit who received the cheque explained to the paying teller that Roman numerals were the only ones used in French up to the tenth century and they were just as valid in France as the ordinary Arabic, which are the numbers now used universally.

## Limestone in Canada

Every province in Canada except Prince Edward Island contains workable deposits of good quality limestone. In the case of Saskatchewan the limestone is inaccessible at present and it is not worked. On the other hand, the principal producer followed by Quebec, Manitoba, British Columbia, Nova Scotia, New Brunswick, and Alberta in order of production.

## A Narrow Escape

Jimmy came home and said, "I almost had some watermelon to eat."

## "How was that?" his mother asked.

"It was over playing at Sammy's house, and his mother opened the ice-box, and there was a watermelon in it, Sammy said, 'Couldn't I have some?' and if she had said 'Yes' we would have."

## Patient—"Doctor, I often feel like killing myself. What shall I do?"

Doctor—"Leave it to me."

## Improvement In Canadian Cheese

Complimentary Grading Has Brought About Ready Advance In Quality

Canadian cheese has made a steady advance in quality since compulsory grading began in 1923. In a review of grading during the past year Mr. Joseph Burgess, chief of the division of dairy products, in the Department of Agriculture at Ottawa, brought out the fact that about 98 per cent. of the entire milk of the Dominion, with 98 per cent. of the cheese graded, scored in the classes for "special" and "first grade."

All of the provinces have shown a marked improvement in quality, with Ontario leading in this respect with 94.7 per cent. in the two highest grades. In the first year of grading the percentage of the two highest grades was only 78 per cent., which compared with the results last year shows the value of compulsory grading in improving the quality of the output.

Mr. Burgess announces that the output of 76 of the 601 factories operated in the provinces of Ontario graded 100 per cent., while the production of 483 factories graded between 95 and 99 per cent. The output was an increase over 1927 of 31 in the factories making perfect cheese and of 162 factories making cheese of 95 per cent. or more. The improvement was also shown in the quality of cheese made in the other provinces where the improvement was an important branch of the dairy industry.

In Prince Edward Island there was an increase of 3 per cent. in the highest grades; New Brunswick, 9.3 per cent.; Quebec, 11.8 per cent.; and Manitoba, 4.4 per cent. Compared with the previous season, covering all the cheese-making factories, there was an increase of 6.7 per cent. of the output that scored about 93 per cent.

## Clean Milk

Main Sources Of Contamination Are Pointed Out

The sanitary quality of the milk produced in the farms has a tremendous influence upon the welfare of the dairy industry. This view was expressed by Dr. Grant Leckband, bacteriologist to the Dominion experimental farms, who credits the producer and the methods employed with more importance than the barn and the dairy equipment he possesses.

Elaborate equipment is no guarantee of clean milk. Contamination from all sides must be excluded in the production of the highest grade of milk, and this means that care must be given to stables, barns, utensils, milkers, and the methods used by the milker.

Clean pails, properly scalded, and the changes removed for dirt falling from the cow into the pail reduce to a minimum, are two of the main points, and the best places to commence in cleaning up the milk supply. These are the main sources of contamination and any care with minor sources to the neglect of those mentioned is largely wasted effort. Pamphlet No. 78, "Producing Clean Milk," published by the Department of Agriculture, at Ottawa, expresses the view that a clean pail, and a clean cow are the main factors in producing clean milk.

## Coina Bring Good Price

A \$50 gold piece, minted in 1852, sold for \$109 at a sale of antique coins at Gettysburg, Pa. One side of the coin was plain, but the other had a figure and inscription, together with the date of issue. The coin was octagonal shaped. Another 23 gold coins, bearing only the mint-date of 1868, sold for \$6.

Languages learned by young children are forgotten easily, often within a few weeks.

The only people who can raise money easily are those who don't need it badly.

"My matrimonial agency was a great success. My wife divorced me, leaving only 'my clients' — Dorfbarber, Berlin.

## CRUMBLY TEETH

Help your children to have sturdy bodies, sound bones and strong teeth. Give them

**Scott's Emulsion** rich in vitamins. It cures the needs of childhood equally as well as it does grown people.

Scott's Emulsion, Toronto, Ont.

## Pulmotor No Longer Used

Replaced By New Device Which Works On Different Principle

The disappearance of the pulmotor, for many years a staple of resuscitation, is the result of a steady rise in gas intake or a dramatic explosion case, has been emphasized by the recent series of smoky fires in New York. At the headquarters of the safety bureau of the Brooklyn Museum Co. it was said, that the company has not used a pulmotor for a long time, and it was doubted whether a single one was used today in the entire city.

The company, like the police and fire departments, uses the so-called "CO<sub>2</sub> inhalator," an apparatus carried in a portable case, which is used by the police and is often mistaken for those who use it in opera. Actually it depends upon an essentially different principle, the pulmotor having been tested and condemned as long ago as 1911 by the bureau of mines and public health.

The pulmotor was simply a pump which forced pure oxygen into and out of the lungs of a patient suffering from partial asphyxiation. It was disproved on the ground that artificial asphyxiation, even within the lungs was likely to damage the air passages and cells, while it was discovered that the normal effect of the pure oxygen was to depress natural breathing. Scientific study showed that the lungs were naturally stimulated by a certain amount of CO<sub>2</sub>-carbon dioxide. This is because the automatic breathing of each individual depends upon the presence of carbon dioxide in the lungs.

## Canada's Newest Playground

Prince Albert National Park

New Hunting Grounds

The new hunting grounds of the Prince Albert National Park, Canada's newest national park, was once the hunting ground of the Cree Indians and a band of this tribe is now located on a reserve immediately adjoining the park. The new park has an elevated area of about 1,500 feet above sea level and enjoys in summer a climate which makes it possible to live outdoors for months at a time. Situated as it is near the city of Prince Albert, it is less than 600 miles from Winnipeg by motor highway, and 500 miles from the international boundary. The main port of entry for United States visitors is North Portal, Saskatchewan.

## Efficient Mail Service

The air mail service operated by the Western Canada Airways Limited for the Canadian post office department into making districts of northern Ontario and Manitoba this year was 100 per cent. efficient. One hundred and two trips to the camp were made on the schedule and all were made without any delay or loss of a single piece of the 75,221 pounds of mail carried.

## Not A Bad Idea

The title of "madman" is given in some parts of the United States to a "mad" person, but in the United States the daughter-in-law then becomes "Mrs." By this means they avoid the inadequate phraseology of "Old Mrs. A." or the Scotch "Mrs. A. sen."

## Guard Against FLU Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "The" usually starts with sore throat. The germs are killed by some antiseptic treatment a serious injury may develop.

A simple treatment is to gargle the throat three times daily with NERVINE. The antiseptic properties of NERVINE quickly destroy the germs in the throat. Of course if the chest is sore NERVINE should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the eruption and break up the cold.

To prevent "flu" or colds from gaining holdover NERVINE will prove most effective. It is hardly necessary to point out that the towels should be sterilized and the system purged of all waste materials. For this purpose Hamilton's Pills are recommended. They act without griping or discomfort of any kind. The action of NERVINE and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

## Record of Navigation In Hudson Straits

First completion of record in the department of railways and canal shows that the Hudson straits were navigable last year with the doubtful exception of a period of three days until Dec. 2.

In 1927 navigation in the straits did not close until Dec. 10, that for two years the period of navigation on the northern trade route has continued until about the same time as on the Great Lakes.

In 1928 observations of the department in the straits were not as complete as in 1927 when a daily ship patrol was maintained. Last year the observations were made from the three bases maintained along the passage from Hudson's bay to the Atlantic.

Observers could send only a few miles from land, and while they reported ice in this area they might well have been open passages, many miles in length, beyond their vision. Observations were made from a stationary position. Government officers stationed in the straits reported that ice fields had gathered and that 29 miles were visible on Nov. 10. This condition prevailed three days when the ice fields spread seaward from the north and east.

It is recognized here, of course, that navigation of the straits is only part of the new route and that conditions at the various ports on the way will be of great importance. Port Churchill from over last year, early early, but marine engineers at the port were certain that the ice breakers would have kept the port open as long as navigation of the straits was possible. York Factory, the northernmost end of the route, has no railway connection at all, but it is thought that ice conditions would be somewhat better there than at Churchill.

## New Kind of Glass

Said To Have Some New and Desirable Properties

The invention of an entirely new kind of glass is announced at the University of Pittsburgh. The glass is made with beryllium, chemical elements that, occur in a few comparatively rare minerals. One of its properties is increased hardness, which seems to offer a field for making optical glasses of better resistance to minute scratches than comes from wear.

The new glass is an admirably considerable ultra-violet light, the harmful effects of which in small quantities have been well established. Whether the ultra-violet transmission is a permanent property, or something that might slowly change with use, has not yet been tested. The glass was made in the department of Prof. Alexander Silverman, head of chemistry, by Chai Pang Tai, a Chinese research fellow. His interest in producing the glass sprang from a desire of studying the properties of beryllium compounds for their country's deposits of beryl, a mineral containing beryllium. When separated from other substances, beryllium oxide is amorphous. In making the new glass, it is substituted for lime, which is used in ordinary glass. Professor Silverman said that beryllium oxide will be tried in combination with other chemicals to discover its possibilities for making still different types of glass.

## Has Changed Somewhat

Canon Tollington tells of a lady who asked one of her domestic staff to get the butter from the church, what the proscriber had said. "Well, m'lord," was the reply, "I can't tell all he said, but he did say that it was not what it used to be."

The joke you play on another too is a mean trick when he plays it on you.

## Scientist Thinks Life Should Be Shorter

After Generation Should Make Room For Younger, Says

807 Arthur Keith

Human beings would cease to live at 40 or 50 years of age if conditions were the greatest of living conditions, disagreeing with the contention that man can and should be made to live 100 years or more.

"I am very competent," commented Sir Keith, "I would not try to prolong human life into old age. On the contrary, my idea would be to truncate a body which would maintain its complete physical vitality and mental energy for 40 or 50 years, then suddenly disappear."

"Forty-five is nature's ideal for man. It is at this period that one can say that human life begins to age."

"It is not at that age that the average man's life ends," he said, "he is asked; then he himself replied to the question with an emphatic exclamation: 'Of course, it is. It is not at that age that the average man's life ends, but at that age that the average man's life begins to age.'"

Prior to the era of civilization, the normal age attained by men and women was from 40 to 45. Civilization, however, has gradually extended this age to between 60 and 75. Nowadays, men even desire it to be prolonged to the century mark. I think it is one of the most foolish of things for men to want such a long life.

After all, he said, "when we go to a crowded restaurant for a meal as soon as our food is served we get out, making room for others, not waiting for them. I think the same should apply to human life. When the older generation has lived its life it should make way for the younger ones."

## Defective Teeth

Dental Decay's Troubles Largely Reducible

Dental decay is the most common defect of school children and is present in about 80 per cent. of them. The United States bureau of education reports in calling attention to a study that has been made of the causes of dental decay and treatment of such conditions.

It is stated that this is due to changes which were made in man's diet. The modern diet is not so essential for making sound teeth having been too scanty in over-ripe fruits and vegetables.

"Some races," the bureau said, "which have followed more closely nature's laws in this respect, still have sound teeth. They have made the mistake of bad teeth, but although good teeth run in families, it is not an inherited trait. It is at the bottom of this good factor. It hardly seems an important factor, dental decay would never have occurred, for time was not it did not exist, and certainly had it not been for the decay factor, survival. Hereditary tendency should be even more strongly influential for the production of good teeth than of bad ones."

## A Coyote Farm

Largest Addition To List Of Fur-Bearing Animals Raised in Captivity

Two young boys living 90 miles northwest of Edmonton started a coyote farm in 1927 by digging young coyotes out of the ground and confining them in a pen. They got 140 young animals and when their skins were mature sold them \$12 each. The coyotes in the pen addition to the list of Canadian fur-bearers being raised in captivity.

## Should Eat More Apples

It is estimated that each Canadian consumes an average 12 apples each year. This might easily be doubled without any damage to either the grower or the consumer. The apple is the only one of the fruit of trees.

Old Gentlemen—"Why, is the situation so far from the town?"

Porter—"Dunno, but I think it is to have the next truck."

W. N. O. 1770

**COUGHS & COLDS**

Get relief from coughs and colds by using SPOHN'S Cough Syrup. It is the only cough syrup that gives instant relief. It is the only cough syrup that is safe for children. It is the only cough syrup that is safe for the throat. It is the only cough syrup that is safe for the lungs. It is the only cough syrup that is safe for the heart. It is the only cough syrup that is safe for the stomach. It is the only cough syrup that is safe for the bowels. It is the only cough syrup that is safe for the kidneys. It is the only cough syrup that is safe for the bladder. It is the only cough syrup that is safe for the uterus. It is the only cough syrup that is safe for the vagina. ### Interesting

#### Local Items

Mrs. Kerr made a business trip to Calgary last week.

P. G. Foster, formerly of Medicine Hat, is in Edmonton last Thursday.

Mrs. Hilda was in Calgary this week purchasing her new spring stock of both ladies' and gent's wear.

The new seats for Gordon Memorial church arrived in town last week from the east. They will be put in place in the church as soon as possible.

John Marquis, 19 year old son of Mr. and Mrs. Geo. Marquis, formerly of the Alderson district, died from the flu in Edmonton last week.

Keith Hopper, of Winnipeg, stopped off in town last week on his way to Vancouver, to visit his aunt, Mrs. M. L. Stone.

The S. O. E. Valentine dance last Tuesday evening proved a great success. There was a good attendance and all thoroughly enjoyed the evening's program.

In the examinations for January at the Medicine Hat high school, Francis Macpherson stood first in class III. She is the taking part in the musical program at the school tonight. Other Redcliff pupils whose names appear in the list for their respective classes are: Joyce Rose, W. Sellars, G. Lapp and Muriel Collard.

### Our Service

The Bank was established in 1875, and during a period of more than fifty years Branches have been established from time to time at carefully chosen points. The service at all Branches is local and personal, but it is also world-wide in scope. A moderate sized Bank—not too machine-like—with a friendly interest in its clients.

Ruth and John Lindbergh.  
Send order with remittance to the PUBLISHERS OF THIS  
PAPER, at 1215 VICTORIA BUILDING, S.W. 10th St.,  
Edmonton, Alberta.

J. W. Pickard, who has conducted a fish market in Medicine Hat for a number of years, died suddenly Wednesday morning.

The Cullis football club in the Hat was organized last Tuesday evening. Sam Giddis was elected president and MacIntosh, secretary.

Mrs. W. B. Smith of Gordon Memorial manse, was taken to the Medicine Hat hospital last Wednesday suffering from intestinal trouble. She will undergo an operation on Monday.

Mrs. A. J. Leamonth, Mrs. McCleary and Mrs. Kellott attended the Robokal Grand Lodge in Calgary this week. W. Pabau was the delegate from the lodge. I. O. O. F. lodge.

W. J. Manfield, manager of the greenhouse here, is at present in the Medicine Hat hospital where he underwent a minor operation. He is now progressing favorably.

General Edward Higgins was chosen head of the Salvation Army to succeed General Booth. The new general stated that there will be many democratic changes in the army's constitution and future government.

The exceptionally good pictures being shown at the Cameo theatre from week to week are delighting its patrons. The management deserves the support of townspeople in his effort to supply the best pictures.

The new machine recently installed at the glass plant is now turning out a fine sample of ink bottles in addition to a number of other lines of glassware. It is expected that in the near future some other lines not previously made at the plant, will be manufactured.

Masons of Medicine Hat and Redcliff Lodges will attend service in the Fifth Avenue United Church, Medicine Hat, on Sunday afternoon, Feb. 24th. Local members who wish to attend are asked to leave their names with H. Champ so that arrangements may be made for transportation.

### Here and There

(231)  
Large cargoes of wheat are being shipped to Japan and the Orient through Vancouver these days. It seems the stevedores in Newcastle to send flour to "The Floury Kingdoms."

Some foundation for the old nickname "woolly" west is found in the report that Alberta's wool output for 1928 amounted to 2,000,000 lbs. of wool. Altogether the Dominion produced over sixteen and a half million pounds.

Steel is replacing wood in freight service on the Canadian Pacific Railway as 7,500 box cars now on order for the company will be of steel construction. They will have a capacity of about 2,000 bushels of grain and a load of 120,000 pounds.

Pur-farming is developing many branches, one of the most recent being the organization in Manitoba of the Manitoba Muskrat Breeders Association. The body plans to study muskrat breeding conditions and to investigate all phases of the industry.

In a recent speech at Kitchener, Ontario, E. W. Hearty, chairman and president of the Manitoba Pacific pointed out that the average freight rate per ton per mile in Canada is about 4 1/2 per cent lower than in the U.S., and that the average of Canadian grain rates is 40 per cent lower.

The Trans-Canada will cross the Rockies in 1930, and in less time eastbound, and an hour less westbound than it did last year. This does not mean that Canada has got any smaller, but that the Canadian Pacific Railway is running the famous flyer on an improved schedule.

Penny postage, inaugurated at Christmas, is working well and bringing about a notable increase in letter mail from Canada to the British Isles, according to federal postal officials. It is estimated that the increase in the course of the year will be sufficient to offset the \$200,000 estimated reduction in revenue by the penny rate.

In Manitoba, there is one tractor for every 4.6 farms; in Saskatchewan, one for every 3.6 farms; and in Alberta, one for every 7.5 farms. If all the tractors were pooled together, how long could it take a garage mechanic to reach the moon?

For the sixth consecutive year Dean Shalaby, Laird of Macdonald Island, St. Anne de Bellevue, Quebec, will conduct an all expenses tour across Canada and back, starting from Toronto on July 23, and lasting for 31 days. The party travels in a special train with a baggage car filled up as a sixty-foot dining-room.

Equipped with a low-runner, a new device that will aid navigating the harbours of Victoria and Vancouver and the waters of the British Columbia coast, the British North has arrived on the Pacific seaboard to join the fleet of the R. C. Constable service of the Canadian Pacific Railway. She is the eighteenth ship to be built for this work and has just been constructed at the shipbuilding yards on the Clyde in Scotland.

Some 200 of the thousand head of buffalo in Elk Island Park east of Edmonton, have been slaughtered during December to control the size of the herd within the carrying capacity of the park. It is expected that most of the meat just secured will be shipped north in the form of pemmican to provide food for Eskimo inhabitants of the Northwest Territories as a result of the growing demand for this pemmican following the trial shipments made last year.

Supplies for the 150 inhabitants of the lonely little island of Tristan da Cunha in the southern Atlantic not far from St. Helena are hoisted regularly by Montreal chartered of the I.O.S.E. and will be delivered in February by the Canadian Pacific liner "Duchess of Athol". This great liner, making regular trips to South America and Africa, is one of the few vessels to call at the isolated point. The visit is one of the unique features of the island for the passengers and the event of the year for the inhabitants of the island.

Miss Inez Gagner skis for the love of the thrill of the sport. Her instructor, Ivin Nelson, engages in the sport professionally. Both, however, agree that the environs of Quebec are unequalled anywhere in the world as a skiing or general sport playground. Besides tutoring the timid and giving periodic exhibitions of ski-daring, Nelson, with his fellow professionals at the Chateau Frontenac, Messrs. Oliver Kalish and Arnold Stone, all of whom are internationally known, organize parties to such places as Montmorency Falls and other favourite skiing localities within a few miles of Quebec.
